CONSOLIDATED COMMERCIAL FEE SCHEDULE

Commercial Inspection Fees

The fee schedule for inspections is based upon the latest building valuation data report of square foot construction costs published by the ICC valuation service, with a regional modifier applied. Actual cost submitted to and accepted by the Municipality may also be used. A \$50 Application/Processing charge is applied to all projects submitted on this fee schedule.

Large projects that require long-term multiple inspections (progressive inspections) are calculated as follows:

Projects with a total construction cost of \$0.00 to \$499,999.99*

Total construction cost X .002 = insurance cost
+ Estimated length of the project in weeks X \$50. = labor & travel cost
= Total
or no less than \$50. Per trip based on the scope and complexity of the project.

Projects with a total construction cost of \$500,000.00 to \$2,000,000.00*

Total construction cost X .002 = insurance cost
+ Estimated length of the project in weeks X \$50. = labor & travel cost
= Total
or no less than \$50. Per trip based on the scope and complexity of the project.

Projects with a total construction cost of > \$2,000,000.00 to \$6,000,000.00*

\$4000.00 + [(Total construction cost - \$2,000,000) X .0009] = insurance cost
+ Estimated length of the project in weeks X \$45. = labor & travel cost
= Total

Projects with a total construction cost of > \$6,000,000.00 to \$10,000,000.00*

\$7600.00 + [(Total construction cost - \$6,000,000) X .0008] = insurance cost
+ Estimated length of the project in weeks X \$40. = labor & travel cost
= Total

Projects with a total construction cost of > \$10,000,000.00 to \$30,000,000.00*

\$10800.00 + [(Total construction cost - \$10,000,000) X .00075] = insurance cost
+ Estimated length of the project in weeks X \$40. = labor & travel cost
= Total

Projects with a total construction cost of > \$30,000,000.00 to \$50,000,000.00*

\$25800.00 + [(Total construction cost - \$30,000,000) X .0007] = insurance cost
+ Estimated length of the project in weeks X \$40. = labor & travel cost
= Total

Projects with a total construction cost of >\$50,000,000.00 to \$100,000,000.00*

$$\begin{array}{r}
 \$39800.00 + [(Total\ construction\ cost - \$50,000,000) \times .00065] = \text{insurance cost} \\
 + \text{Estimated length of the project in weeks} \times \$40. = \text{labor \& travel cost} \\
 = \text{Total}
 \end{array}$$

Projects with a total construction cost of >\$100,000,000.00 to \$200,000,000.00*

The inspection fees for Mechanical, Plumbing, Electrical, Energy, Accessibility, and Fire Protection are computed at 25 percent of the building inspection fee for each discipline. Multiple prime contracts will be computed the same as a building inspection fee and combined prime contract fees shall be no less than a single contract fee, distributed on a percentage of the total basis.

Inspection Fee Example:

Type of Construction: 2C
Use Group: B

Height: 1 story, 12 feet
Area/Floor: 10,000 sq. ft.

Solution		
1	Gross square footage: 1 story X 10,000 square feet	10,000 sq. ft.
2	Compute estimated construction value	
	Type of construction factor	1.02
	Gross area modifier	67
	Estimated construction value (30000 X 1.02 X 67	\$683,400.00
3	Compute plan review fee	
	Building: \$683,400. X .002	\$1,366.80
	Mechanical, Plumbing, Electrical: (.25 X \$1366.80) X 3	\$1,025.10
4	Total inspection fees	\$2,391.90
5	Commonwealth Discount fee: X .80 (if applicable**)	\$1,914

*Pricing schedules assume that the project will not cause an increase in our insurance costs.

**Smaller projects may be calculated at \$100 per inspection category, but no less than \$50 per category.

***Discounts may be given for warehouses, building shells, or repetitive work at the discretion of the plan review and inspection departments

Commercial Plan Reviews

We will perform commercial plan reviews. Our Commercial Plan review fees (\$150 minimum) are calculated according to the ICC Valuation Service or actual cost of construction as follows:

Estimated Construction Value \$ 0. to \$ 1,250,000. = Construction value X .0015
(\$150 Minimum)

Estimated Construction Value \$ 1,250,000. to \$ 5,000,000. = \$1,875. + (.0005 X construction value over \$1,250,000.)

Estimated Construction Value over \$5,000,000. = \$3,750. + (.0004 X construction value over \$5,000,000.)

Plan reviews for mechanical, plumbing, electrical, energy, accessibility, and fire protection are computed at 25% of the building plan review fee for each discipline.

Special pricing may be given to buildings such as warehouses due to their relative simplicity or structures with repetitive features such as high-rise buildings

Plan Review Fee Example:

Type of Construction: 2C Use Group: B
Height: 3 stories, 35 feet Area/Floor: 10,000 sq. ft.

Solution		
1	Gross square footage: 3 stories X 10,000 square feet	30,000 sq. ft.
2	Compute estimated construction value	
	Regional Modifier	1.02
	Square foot cost of construction	67
	Estimated construction value (30000 X 1.02 X 67*	\$2,050,200.00
3	Compute plan review fee	
	Building: \$1,875 + (2,050,200 - \$1,250,000) X (.0005)	\$2,275.00
	Mechanical, Plumbing, Electrical: (.25 X \$2,275) X 3	\$1,706.25
4	Total ICC Based plan review fee	\$3,981.25

* (Gross area modifier of 67 as an example, actually based on the average building cost per square foot in the geographic area.)
This formula does not reflect changes that ICC may have made to its fee schedule. We will use other plan review services that meet our criteria for consistent quality and charge the same or less than ICC reviews.

Plan reviews covering the requirements of mechanical and plumbing codes are available, each for a fee of 25% of the applicable building code review fee. Plan reviews for the electrical code requirements shall be provided at a fee of 35% of the applicable building code review fee, excluding reviews for any use included in the "I" (Institutional) use group classification. Reviews done for the excluded use classification shall be based on the degree of complexity

A preliminary plan review is available for 50% of the full plan review fee.

Preliminary plan review addresses such code requirements as use and occupancy classification, type of construction, height and area calculations, means of egress, and fire restrictive construction requirements.

The preliminary plan review fee shall be credited towards the cost of a complete building code plan review conducted by Commonwealth Code Inspection Service, Inc.

Expedited or "fast track" plan reviews may be available as time and workload allow. Expedited plan reviews shall be charged at 150% of the regular rate.

**CHECKS FOR PLAN REVIEW FEES SHALL BE MADE PAYABLE TO:
Commonwealth Code Inspection Service, Inc. (CCIS).**
